TEKS 5.4A "Sometimes, Always, or Never?" Directions

1. Make groups of 4. Assign each player a number 1 – 4.
2. Give each player a dry erase board, marker, and eraser.
3. Shuffle the cards and place them in a facedown stack on the table.
4. Player 1 turns over the first card, places it where all students can see it, and reads it aloud.
5. Give each player 30 seconds of "think time" to determine whether the statement is sometimes true, always true, or never true.
6. Record "sometimes true," "always true," or "never true" and justify your response on your dry erase boards.
7. Once all group members have written justifications, in turn, each player states whether the statement is sometimes true, always true, or never true and gives his/her justification.
8. After all players have shared, Player 1 verifies the answer using the answer key below. Group members then work together to help all group members understand the correct response.
9. Repeat the process with another statement rotating the reader/verifier role.

Answer Key	
1. Never	7. Sometimes
2. Sometimes	8. Always
3. Sometimes	9. Always
4. Always	10. Never
5. Never	11. Always
6. Sometimes	12. Never

Sometimes, Always, or Never?

All numbers have at least two unique factors, 1 and itself.

1

Sometimes, Always, or Never?

Even numbers are composite.

2

Sometimes, Always, or Never?

Odd numbers are prime.

3

Sometimes, Always, or Never?

2 is one of the factors for all even numbers.

4

Sometimes, Always, or Never?

All odd numbers are divisible by 3.

5

Sometimes, Always, or Never?

Whole numbers have an odd number of factors.

6

Sometimes, Always, or Never?

Multiples of 5 are composite numbers.

7

Sometimes, Always, or Never?

Prime numbers have only two unique factors.

8

Sometimes, Always, or Never?

Composite numbers have more than two unique factors.

9

Sometimes, Always, or Never?

The number 1 is a prime number.

10

Sometimes, Always, or Never?

All multiples of 10 are composite numbers.

11

Sometimes, Always, or Never?

All whole numbers have at least 3 unique factors.
