SCE - put me in touch with Chair of Internal Audit Keith Jess immediately please - Alistair Finlay and Liz McLaughlin have breached my contract of study last year and putting me in danger and breaching contract of accommodation this year made me feel unsafe.

Attached are the finances I have to survive (none) and lack of refund. Still being treated as if I am lying about only have anxiety symptoms.

Attached is my previous correspondence prior to you illegally removing my items. SCE ignored my email gaslighting me out of existence.

See what I said and then they see the commands and requests forwarded emails from SCE - their emails to me don't make sense - they are just threats.

Mine were legally informed from a disabled British national registered for vacation summer accommodation through external student status.

I now must travel from Dublin to Belfast (where I was nearly killed previously due to QUB acting similarly in September 2024, evidenced by PSNI threat message).

Your sarcasm saying you are happy to help? What about all my food in the fridge and freezer? That I can't afford to restock? That I have no money for travel?

If I didn't have free travel I'd be dead in Belfast - as evidenced by PSNI threat message.

You breaching my contract of study last year and putting me in danger and breaching contract of accommodation this year made me feel unsafe.

You have purposefully triggered my only valid diagnosis of anxiety and PTSD.

QUB have a history of this - prejudice against students. But this summer accommodation had nothing to do with my QUB student status. Breach the Russell Group Protocols explain yourselves to the Russell Group and the PSNI?

How will I move my belongings to and from the hotel? How will you ensure I don't die when the hotel room expires and I still don't have a place to stay?

These are all legally binding questions due to my degree in Education.

How will you get into Heaven for doing this to yet another disabled student? Like Sarah Walker and Natasha Bradshaw but must venerate them?

Alastair and Liz - you know you breached the law illegally accessing my student accommodation and gaslighting the employees that I need to survive.

How will you pay damages for my trauma and reputation in time for me to study my oart time job, pass my dkit exam in august, c

How will you make it to heaven?

I will be using my free travel pass to return from safety in Dublin to return back to a danagerous situation in Belfast that QUB first

Shame. On. You.

NONE of this email is abusive at ALL

EDUCATION University of Galway Higher Diploma in Applied Science (Software Design & Development) Classification: First Class Honours (17%) - Graduated in modules such as Programming 1 (100%), Algorithms & Logical Methods (100%), Internet Programming (100%), CS/Software, Database (100%), Database (100%), Software Engineering (100%), CS/Computer Architecture & Operating Systems (100%) - Received BSc in a pharmacy industry Project developing a machine learning empowered phishing email detector (Python) BA (Hons.) in Mathematics & Education Classification: First Class Honours (18.8%) - Developed Python skills in Cryptography (88%), Networks (88%), Modelling (100%), and Non-Linear Systems (88%) in skills in Applied Statistics (100%), Applied Statistics (100%), Mathematical Skills in Numerical Analysis (100%) - Received a standing invitation after attending a 3-day workshop to Transition Year students 1984 Creative Coding for Maths. Math's Students were taught of the relationship between mathematics and computer programming using Minecraft and one School of Mathematics' Student Modelling Workshop 2022, member of the winning team where Python, C#, and C++ were used to investigate the statistics of the game engine (only in carrying out scientific experiments) - Excellent academic writing and presentation skills in modules such as Philosophy, Statistics & Learning for Diversity (17%) and Research Literacy for Professional Development (88%) - Received University Scholar 2019-2020 Award for achieving among the top results of my cohort WORK EXPERIENCE Frontline Inc. Software Engineer - Implemented custom database for tracking customers utilizing technologies such as Apache Beam, Python, Node.js, SaaS SQL, and Google Cloud Platform (Compute Engine, Cloud Run, BigQuery) to configure FTS pipelines - General familiarity with collaboration tools (Slack, Confluence), Infrastructure as Code Tools (Terraform and Pulumi) and further experience with testing and CI/CD pipelines (GitHub) TeamIQ Software Engineer - Responsible for bug fixes and feature work for the DNS web filtering product WebFilter - Conducted a thorough investigation on the implementation of DNSSEC and DNS over HTTPS and documented the end-to-end process for building and deploying it. Automatically enabled this upon initial deployment of new clusters and created a checklist to enable it on previously provisioned WebFilter (C/C++/C#) cloud servers. Presented findings and progress to the company - Addressed issues related to the company's Windows endpoint and active directory agents - Addressed issues related to the dynamic IP agent installer using Wix Toolset and GPO, creating an adaptable installer with included pre-requisites such as .NET 4.6 that was dependent on local installation environment - General familiarity with a PHP/Laravel codebase, Amazon Web Services, Docker and Kubernetes deployments, testing and the CI/CD pipeline (GitHub), working in a Jira/Jenkins environment, using appropriate Linux, Git and Bash commands Task Steps Computer Science Tutor - Tutored students using Python, Shell, SQL and Python to teach 10 Modelling and programming to children aged 12-16 in association with Connexus to KQ and Progress Ireland - Designed and taught computer science classes in eight primary schools teaching Microsoft Word/Excel, Python and JavaScript to students aged 14-16 - Taught the fundamentals of programming, game design and artificial intelligence to children aged 10-18 through both English and Irish	Galway Community College Galway, Ireland Student Teacher (Mathematics) 10/2019 - 05/2021 - Planned and taught mathematics lessons to 1st Year (Ordinary), 3rd Year (Ordinary) and 5th Year (Foundation) groups. Created student resources, prepared detailed lesson plans in-line with the current curriculum and kept daily and weekly reflections - Carried out an Action Research Project investigating how a classroom response system can be used to promote a constructivist environment and improve learning by allowing for the collection and analysis of students' answers - Worked closely with my co-operating teacher to improve the wellbeing of students with behavioural problems and reduce the risk of early school leaving - Volunteered time for After School Homework Club to help Leaving Certificate students from low socio-economic backgrounds Apple Galway, Ireland AppleCare ANA iOS/Mac+ Advisor T1 06/2014 - 06/2016 - Assisted customers with issues involving iOS/MacOS devices and Apple ID. Developed expert troubleshooting skills and a strong understanding of operating systems, hardware and professional knowledgebases - Received two AppleCare Excellence awards for excellent metrics with 95% Customer Satisfaction, 85% Issue Resolution, 10% Tier 2 Escalation Rate and 14-minute Call Handling Time on average - Won the Customer Satisfaction Elite Award for ranking among the top 10 advisors worldwide based on call metrics and positive customer surveys COMPUTER SCIENCE PROJECTS (GITHUB) Machine Learning Phishing Email Detector (Python - NumPy, SciKit-learn, PyTorch, Transformers, Flower, Jupyter) An investigation into the application of machine learning techniques to the detection of phishing emails, comparing the results and resource costs of the latest methods (e.g. classical machine learning, deep learning, federated learning, transformers) and investigating their applicability to industry Superheroes Search (Rust, HTML/CSS/Javascript, SQLite) A website that queries Marvel's Comics API with the user's choice of Marvel character(s), returning details of the comics in which they've appeared and appending them to the page using Asynchronous Javascript and XML (AJAX)
SKILLS PROFILE Independent Learning Determined and self-motivated work ethic, evidenced by successfully completing projects and certificates alongside my final year studies. Quickly adapt to new situations and responsibilities, with a strong belief in lifelong learning. Enjoy continuing my personal development and independent studies alongside work projects, helping to continuously improve my performance. Problem Solving Experience troubleshooting software issues for Apple, TeamIQ and Frontline, dealing with daily challenges in the classroom, and developing mathematical maturity throughout my mathematics and software development degrees have all led to robust problem-solving skills. Teamwork Appreciate the value of working within a team, based on the findings of educational research as well as my own experiences. Consistently make an effort to promote a positive atmosphere where people feel comfortable sharing their perspectives and enjoy working with, and learning from, my peers.
