Subject: arranging an appointment in person?

Student ID: 25132196

Due to homelessness and being victim of assault in both Galway and Belfast I was luckily enough to contact UCL accommodation to bring my previous arranged contract in the end of 2425 academic year to 2 days ago

I am in London and I'm trying to arrange the final Prerequisites from my course offer for the PGCE in computing

I'm extremely grateful for the accommodations granted me by UCL Student Wellbeing and the kindness as I've received when getting in touch which really reminds me of my disability office back home at the University of Galway

Unfortunately, my disability advisor is on leave and there are a few things that I need to discuss with a well-being advisor if possible

I understand that maybe the most quickest way to get that done might be a phone call or via teams but I would also like to request if possible to have a meeting in person as my anxiety and complex post-traumatic stress disorder has unfortunately been exacerbated in a way but I didn't expect when I was last in touch

I tried to find a phone number to ring for the location of the student office, but I do think that without having a student card yet I'm precluded from attending your office in person

Please excuse any typos as I'm using speech to text and due to the being the victim of assault in Belfast sustaining multiple concussive blows to my skull - when my anxiety disorder is exacerbated if I try to proofread everything I unfortunately get a brain zap

this is something that is improving and won't affect me at school placements as that environment is therapeutic to me after struggling through hardship and getting a 1.1 BA in Mathematics and Education with multiple good reports from schools placements. Find some of my history teaching the equivalent of primary and KS3 in Ireland

You can find attached also evidence from the police service of Northern Ireland that I was a victim of criminal attack at my previous address in Belfast last year, which is where I sustained that damage to my brain

something I didn't previously disclose to student wellbeing as I already have my anxiety disorder and complex post traumatic stress diagnoses and have been consistently called a liar by past friends and family

Hopefully I can arrange an appointment later this week or next week

Mise le meas (me with respect)

Cian Lyons (Cian Mac Liatháin)
