Subject: IMPORTANT: Welcome to your Secondary PGCE at UCL - essential
information to get you started
Date: 19 Jun 2025 at 12:21:49

Just re-sharing the information below about preparing for your PGCE Secondary starting this September, in case anyone missed it. If you've already seen it, feel free to ignore this!

Dear IOE student teacher,

Congratulations on securing a place for our 2025-26 Secondary PGCE, it's great to have you as part of the course and to be accompanying you on your first steps into teaching.

While the course formally begins with enrolment at the end of August this year, there are a number of compulsory pre-course tasks that you need to complete in advance in order to be ready for the start-line in September. These include setting up your Primary or Initial School Experience, watching and responding to our Online Summer School videos, and attending our online Welcome Event on 2nd July.

Details of all of these are available via our Secondary PGCE Pre-Programme 2025-26 space on UCL Extend which you must register for to access following these steps:

1. Go to extendstore.ucl.ac.uk or [click here](#)
2. In the 'What would you like to learn about?' box, search for 'Secondary PGCE' and click on 'Secondary PGCE Pre-Programme 2025-2026'
3. Click the blue 'SELECT' button and follow the instructions to register with UCL Extend.

[In this short video](#), I guide you through exactly what you need to do to register and help you navigate around key tasks within the Pre-Programme Space. If you have any problems registering, do consult this video first – and if you still need support feel free to contact your relevant subject administrator.

With very best wishes,
Ben Hammond BEM BA MA PGCE
Secondary PGCE Programme Leader
