List of Suppliers

Polypeptide ^[1]

BPC 157 is a pentadecapeptide comprising 15 amino acids. It is derived from the body protection compound (BPC) found and isolated from human gastric juice. Animal studies have demonstrated its ability to expedite the healing process for various types of injuries, including muscle, tendon, and ligament damage. Moreover, BPC 157 has exhibited organ-protective properties and has been found to aid in the prevention of gastric ulcers. When administered systemically in the digestive tract, BPC-157 combats conditions such as leaky gut, IBS, gastrointestinal cramps, and Crohn's disease. This peptide has also shown analgesic characteristics. Research has indicated that BPC-157 enhances the healing of skin burns by promoting increased blood flow to damaged tissues. Furthermore, it significantly accelerates the formation of reticulin and collagen, stimulates angiogenesis, and promotes the infiltration of macrophages and fibroblasts, making it a potential therapeutic tool for managing wound healing.

Product Details of [BPC-157]

- Name: BPC-157 (<https://www.polypeptide.ltd/product/bpc-157/>)
- Sequence: Gly- Glu-Pro-Pro-Gly-Lys-Pro-Ala-Asp-Asp-Ala-Gly-Leu-Val
- Molecular Formula: C₆₂H₉₈N₁₆O₂₂
- Molecular Weight: 1419.556 g/mol
- PubChem CID: 108101

BPC-157 Peptide Research

BPC-157, also known as Body Protection Compound-157, is a derivative of the naturally occurring body protection compound (BPC). [2] BPC is a protein that is naturally found in the human digestive tract and plays a crucial role in protecting and healing the lining of the gastrointestinal tract. Additionally, it promotes the growth of blood vessels, aiding in the process of tissue repair.

Synthetic BPC-157, a pentadecapeptide consisting of 15 amino acids isolated from the larger BPC protein, has demonstrated numerous healing properties similar to those of its parent molecule. Specifically, BPC-157 exhibits effects on:

Promoting wound healing Stimulating blood vessel growth Modulating the coagulation cascade
Facilitating nitric oxide generation Enhancing immune system function Regulating gene expression
Modulating hormone activity, particularly in the gastrointestinal nervous system.

Storage

Sealed in dry, Room Temperature

Manufacturer

Best peptides Bpc-157 5mg & 10mg Manufacturers - Polypeptide
