Legal Disclaimer

Cerebrolysin has [not been approved](#) by the US FDA to treat, cure, or prevent any disease. The statements on this page concerning its effectiveness or safety might contradict the views of the US FDA and solely reflect its status elsewhere. Before using Cerebrolysin for treatment of serious conditions consulting a qualified MD is mandatory. An effective therapy often includes different drugs and using Cerebrolysin as a mono-therapy might be ineffective and even dangerous.

Buy Cerebrolysin peptide Online!

Cerebrolysin is a mix of enzymatically treated neuropeptides (20%) and amino acids (80%) derived from pig brains. Its constituents can include low molecular weight neuropeptides that are similar to fragments of natural neurotrophic factors

(NTF), for example, ciliary neurotrophic factor (CNTF), brain-derived neurotrophic factor (BDNF), glial cells derived neurotrophic factor (GDNF), nerve growth factor (NGF), and insulin-like growth factor (IGF).

Cerebrolysin has been studied for potential use in a wide variety of neurodegenerative disorders, such as dementia including Alzheimer's disease, stroke, and traumatic brain injury (TBI).

Cerebrolysin is available in different ampoule sizes: from 2ml to 20ml. We offer worldwide shipping!

Generic name:	Cerebrolysin, FPF-1070
Form:	Solution for intramuscular and intravenous injections in ampoules/vials.
Form description:	Transparent solution of amber color
Active ingredient:	215.2 mg of Cerebrolysin concentrate in an aqueous solution
Excipients:	Sodium hydroxide and water for injection
CAS Number:	12656-61-0
ATC code:	N06BX Nootropics
Shelf life:	5 years. Do not use it beyond the expiration date printed on the package.

Storage:	Store at temperatures not exceeding 25°C (77°F). Do not freeze. Protect from light.
Manufacturer:	EVER Pharma, Austria. www.everpharma.com

What is Cerebrolysin

Used For?

Cerebrolysin is a neuropeptide preparation with **neuroprotective** and **neurorestorative** effects. In some countries this “smart drug” is used in the complex treatment of cerebrovascular disorders:

Strokes and stroke complications;
Alzheimer’s disease and other types of dementia;
Traumatic brain injuries;
Spinal cord injuries;
ADHD in children;
Antidepressant-resistant depressions;
Other brain diseases.

What are Cerebrolysin

Benefits?

According to the manufacturer, Cerebrolysin is used in the complex treatment of acute and chronic disorders of the central nervous system (CNS). It supports endogenous repair

and recovery processes after an injury or degenerative disease. It also helps to protect the brain against pathological events and cascades. Cerebrolysin mechanism of action resides in its ability to activate endogenous defense mechanisms (ESM), which include four main components: 1) **Neurotrophic**, 2) **Neuroprotection**, 3) **Neuroplasticity**, and 4) **Neurogenesis**.

As practice shows, repeated and long-term courses of treatment with Cerebrolysin peptide lead to an increase in the effectiveness of neuro-therapy, especially in relation to improved cognitive and behavioral functions.

In clinical practice, Cerebrolysin is known to reduce symptoms of depression, cognitive impairment, and autonomic disorders. It is said to relieve pain syndrome and enhance the effect of tricyclic antidepressants.

Is Cerebrolysin Safe to Take?

Cerebrolysin has an excellent safety record. Unless taken in large amounts (>10 ml), adverse reactions are mild and rare.

Special attention shall be taken when stacking Cerebrolysin with antidepressants, including MAO inhibitors.

Where To Buy

Cerebrolysin?

Authentic Cerebrolysin ampoules for injection are available at CosmicNootropic.

We offer the most popular forms:

Cerebrolysin 5ml and Cerebrolysin 10ml ampoules as well as other volumes depending on the purpose of use.

You do not need a prescription to obtain Cerebrolysin online. Buy it with worldwide delivery. CosmicNootropic offers bulk discounts 👍
