Class: Transition Year

Date: 14/09/2020

Transformational geometry involves the movement of objects and points.

Use www.mathsisfun.com/geometry/transformations.html to help you write your own definition of the **4 Transformations**.

1. Rotation:	
2. Reflection:	
3. Translation:	
4. Resizing:	

What is different about Resizing compared to Rotating, Reflecting and Translating?

Transformational geometry involves the movement of objects and points.

Use www.mathsisfun.com/geometry/transformations.html to help you write your own definition of the **4 Transformations**.

1. Rotation:	Rotation Means turning around a center.
2. Reflection:	You get a reflection in an image when every point is the same distance from the 'central' or 'mirror' line.
3. Translation:	Translation in geometry simply means moving.
4. Resizing:	When you resize a shape it gets larger or smaller.
