

Selection of values from R command: `qf(0.05, df1, df2, lower.tail = FALSE)`

F distribution for $p = 0.05$

For various pairs of degrees of freedom (v_1, v_2), the tabled entries represent the critical values of F above which the proportion $p = 0.05$ of the distribution falls. (Example, for $df = 3, 8$ and $F = 2.92$ is exceeded by $p = 0.05$ of the population.

$p = 0.05$		Degrees of freedom for the numerator v_1
